PROFESSIONAL SUMMARY

Results-driven Full-stack developer with 4+ years of hands-on experience building scalable web and mobile applications. Proven expertise in modern JavaScript frameworks (React, Next.js, Vue.js, Nuxt.js, and WordPress) and backend technologies (Node.js, Rust). Demonstrated ability to deliver complex projects from concept to deployment, including cryptocurrency exchanges, e-commerce platforms, and SaaS products. Currently leading technical innovation as CEO of Cionde, developing enterprise-grade solutions with cutting-edge technologies.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, React Native, Expo, and Wordpress
Backend: Node.js, Rust, Actix-web
Mobile Development: React Native, Expo, and Kotlin
DevOps & Deployment: AWS, Docker, CI/CD, VPS Management, Server Deployment
Third-Party Integrations: LiveKit Call SDK, OAuth, Maket data, etc
Development Focus: SaaS Products, E-commerce, Cryptocurrency Exchanges, Booking Platforms, etc.

Experience

Lead Developer / Cionde
OCT 2025 - PRESENT, ONSITE

Lead the development of enterprise SaaS products using the Next.js frontend, Rust backend architecture, and models. Architect and deploy Rust servers to VPS infrastructure, ensuring high performance and reliability while driving technical strategy and product development as founding CEO. Implement modern development practices and scalable system architecture to deliver robust solutions.

Mobile Developer (Contract) / Oyster AI
AUG 2025, REMOTE

Developed UI components and integrated AI features for a skincare routine recommendation system using React Native. Collaborated with the AI team to implement seamless frontend integration with machine

learning models, delivering an intuitive mobile experience for personalized skincare analysis and recommendations

Fullstack Developer / Inhouse HQ
NOV 2024 - NOV 2025, ONSITE

Engineered a cryptocurrency exchange platform using Nuxt.js, React Native, and Rust backend while developing a comprehensive e-commerce solution with React Native frontend and Rust backend. Integrated LiveKit Call SDK to enable real-time communication features across the platform and collaborated with cross-functional teams to deliver mission-critical financial technology solutions. Optimized application performance and ensured secure transaction handling throughout all projects

Fullstack Developer / Shippex
AUG 2023 - 2024, REMOTE

Built a full-featured shipping and logistics platform using React.js and Node.js with real-time package tracking system and live status updates. Developed RESTful APIs for seamless frontend-backend communication and enhanced user experience through intuitive interface design and responsive layouts that improved customer satisfaction

Frontend Developer / Jiggle
2021, REMOTE

Developed an apartment booking platform targeting University of Uyo student community using React.js frontend and Node.js backend. Built responsive web application with booking management system featuring real-time availability updates and created user-friendly interface for seamless property search and reservation process

---

Education

Higher National Diploma (HND) in Computer Science

Federal Polytechnic Oko, Anambra State, Nigeria

Graduated with Distinction | 2023
